# PERSECUTION FOR PROFIT

As part of the Chinese state's genocidal persecution of Uyghurs and other Muslim-majority ethnic groups from East Turkestan (Xinjiang), tens or hundreds of thousands of people are conscripted into factory work across China. These factories have been linked to the supply chains of corporate capitalist giants like **Apple, Zara** and **Nike**.

We demand these businesses investigate their supply chains and cut ties with suppliers using forced labour, as set out by the pledge at **enduyghurforcedlabour.org**.

We demand laws forcing big businesses to pay for full investigations of their supply chains. Results must be public, and they must cut ties to forced labour worldwide.

To the staff working in these stores - our employers are profiting from human rights abuses just like they profit from our low wages & insecure contracts. But they can't make a penny without us. Join a union, organise your workplace, and they'll have no choice but to listen to us.

The Uyghur Solidarity Campaign UK brings together solidarity in the workers' movement for the Uyghur people's struggle for freedom. Find out more:
